## Application & Removal

- Won't stain fabric.
- We recommend testing fabric just to be safe.
- Not recommended for certain types of silk.

### Apply

**Step 1:** Make sure area to be applied is clean and dry, free from any oils, lotions or powders.

**Step 2:** Holding center of breast, roll on Boob Glue® liberally and thoroughly around the entire breast area that is to be placed in garment, avoiding nipple area. Allow to set for approximately 1 minute or until tacky.

**Step 3:** Arrange breasts to desired position in garment. Hold garment in place and press firmly for 1 minute. Remove residual on skin or garment with a damp cloth.

### Remove:

Slowly remove garment from skin against gravity. Boob Glue® rinses off easily with soap and water. Moisturize as usual. Launder as usual.

Re-wearing garment with multiple layers of Boob Glue® without laundering may cause too firm a hold on breasts causing skin to become sensitive upon removal.

Avoid use if skin is sensitive to alcohol.

Do not use on cut, sore, burned, damaged, sun damaged or disordered skin.

It is possible for those with very sensitive skin to experience an adverse reaction to dermatologically reviewed and allergy tested products. We recommend to always test on a small area before using.

See product label for precautions.
